

# Index to Volume LXXII

## Subjects

### Accounting conventions

accounting standards in the United States, 23-27

### Accounting standards

changes in established accounting standards, 171-174

### Akerlof

applying Akerlof's "lemons" model to real estate, 356-357

### American Institute of Certified Public Accountants (AICPA)

fair value and observable market prices, 173

### Appraisal in the United Kingdom

market value for financial reporting, 14-19

### Appreciation

analysis of appreciation/depreciation rates by difference of means, 257-260

real income growth when future income exceeds rate of inflation, 143-146

### Appropriately supported use

as an element of highest and best use, 45-49

### Asset classification

valuation of investment vs. noninvestment properties, 17-18

### Automated valuation models (AVMs)

approaches for determining the accuracy of automated valuation models, 147-154

### Bank-foreclosed properties

as a condition of sale adjustment, 52-53, 55

### Base adjusting

using the proper base, 157

multiple adjustments, 156-162

sequence of adjustments, 155-162

### Beachfront property

impact of distance from beach on property values in shore communities, 333-338

### Behavioral finance

sales comparison approach adjustments for conditions of sale, 50-56

### Canadian Uniform Standards of Professional Appraisal Practice (CUSPAP)

court consideration of *Canadian Uniform Standards of Professional Appraisal Practice* in negligence lawsuits, 339-354

### Capitalization rate

relationship between overall capitalization rate and the discount rate, 135-146

direct capitalization model, 135-146

### Case studies

using case studies to analyze adverse impact of contamination on property values, 111-118

### Charitable Giving Act

regulation of conservation easements, 176-177

### Coefficient of variation

strengths and weaknesses as a tool to examine property valuation conclusions, 147-154

recovery of litigation fees and expenses in actions against the United States government, 92-100

### Conditions of sale

adjustments in sales comparison approach, 50-56

### Conservation easements

definition, 175

capital gains deductions, 176

Charitable Giving Act, 176-177

Internal Revenue Service, 177-178

regulation, 175-178

tax deductions, 176

Uniform Conservation Easement Act, 175

*Uniform Standards of Professional Appraisal Practice*, 177-178

valuation, 175-178

### Crime

impact on value based on severity of crime using FBI Crime Index, 132-134

### Database searches

advanced research techniques, 76-79

### Depreciated replacement cost (DRC)

use in revaluation of specialized properties, 15-16

### Detrimental conditions

testing impact of detrimental conditions on value, 253-262

### Development options

valuation of property with development options, 121-126

### Discount rate

relationship between overall capitalization rate and the discount rate, 135-146

### Discounted cash flow

direct capitalization and zero-growth discounted cash flow analysis produce identical value estimates, 136-146

### Distance education

defined, 266-267

barriers, 269-273

proper design, 267-269

### Dollar adjustments

base adjustments in sales comparison approach, 156-158, 160-162

### Economic conditions

economic conditions and their impact on housing prices and the housing market 216-222

### Electric transmission lines

impact on value of undeveloped land, 125-126

### Eminent domain

Use of eminent domain to transfer nonblighted land to private owner for redevelopment, 311-317

### Energy efficiency

building techniques, 57-68

### EnergyStar

Environmental Protection Agency energy management strategies, 63-67

### Environmental contamination

market response to environmental risk, 300-310

using case studies to analyze adverse impact of contamination on property values, 111-118

### Equal Access to Justice Act

asserting a claim, 94-95

recovering litigation fees and expenses, 92-100

### Existing use value (EUV)

defined, 15-16

### Externalities

impact of externalities on value of undeveloped land, 124-126

### Fair value

defined, 17

distinctions between fair value and market value, 29-31

international standards, 171-174

### Fair Value Measurement Project

Financial Accounting Standards Board (FASB) project to establish consensus on fair value, 172-174

### Financial Accounting Standards Board (FASB)

activities to establish accounting standards, 171-174

development of standards for accounting practice, 24-27, 31-33

efforts to converge International Financial Reporting Standards and United States generally accepted accounting principles, 17

### Financial reporting standards

public reporting standards in the government and private sectors, 23-34

Financially feasible use

as an element of highest and best use, 45-49

### Fisher effect

computing riskless real rate and risky real rate, 123

### Generally accepted accounting principles (GAAP)

changes in accounting standards and generally accepted accounting principles, 171-174

overview of generally accepted accounting principles, 24-33

# Index to Volume LXXII

defined, 15-16

### Externalities

impact of externalities on value of undeveloped land, 124-126

### Fair value

defined, 17

distinctions between fair value and market value, 29-31

international standards, 171-174

### Fair Value Measurement Project

Financial Accounting Standards Board (FASB) project to establish consensus on fair value, 172-174

### Financial Accounting Standards Board (FASB)

activities to establish accounting standards, 171-174

development of standards for accounting practice, 24-27, 31-33

efforts to converge International Financial Reporting Standards and United States generally accepted accounting principles, 17

### Financial reporting standards

public reporting standards in the government and private sectors, 23-34

Financially feasible use

as an element of highest and best use, 45-49

### Fisher effect

computing riskless real rate and risky real rate, 123

### Generally accepted accounting principles (GAAP)

changes in accounting standards and generally accepted accounting principles, 171-174

overview of generally accepted accounting principles, 24-33

### **Green building**

sales comparison approach, 64–65  
cost approach, 65–66  
definition, 57  
economic benefits 61–62  
elements, 58–61  
income capitalization approach, 66–67  
regulation, 63–64

### **Hedonic models**

as an economic methodology unsupported by, but using, regression mathematics, 253–262  
to estimate the marginal impact of preservation on property values, 128–134  
to investigate the price differentials for vacant as opposed to occupied houses, 235–236  
pricing model to measure effect of a home owner warranty, 357–361

### **Highest and best use**

deficiencies in current definition, 45–49  
von Thünen land-rent theory of highest and best use, 318–323

### **Historic districts**

relationship between historic preservation district designation and property values, 127–134  
valuation of restored and unrestored properties in historic districts, 127–134

### **Home owner warranty**

effect of a home owner warranty on sale price and marketing time, 355–362

### **Housing bubble**

in New York, New Jersey, and Connecticut area, 216–222  
in Europe, 210–215

### **Housing markets**

European, 210–215  
urban neighborhoods, 127–134

### **Housing values**

using housing value changes to assess the housing market, 220–222  
price appreciation, 216–222  
inflation adjustment, 220–222

### **Income capitalization approach**

investor surveys as reliable source for uniquely paired capitalization rates and discount rates, 135–146

### **Inflation**

adjusting the housing price index to account for inflation, 220–222  
inflation-driven discounted cash flow analysis, 138–145

### **Interest rates**

impact of interest rates on prices and markets, 216, 219–222

### **International Accounting Standards (IAS)**

valuation of property using standards, 16–19

### **International Accounting Standards Board (IASB)**

activities to establish global accounting standards, 171–174  
development of international accounting standards, 26–33  
working to converge accounting standards, 16–18

### **International appraisal**

mark-to-market in the United Kingdom, 14–19  
valuation for financial reporting, 20–34

### **International Financial Reporting Standards (IFRS)**

efforts by the International Accounting Standards Board to address lack of consistency in accounting standards, 16–18

### **International real estate**

comparing the performance and relationships of real estate markets, 163–170

### **International Valuation Standards (IVS)**

valuation using international standards, 14–19

### **International Valuation Standards Committee (IVSC)**

development of international valuation standards, 26–32  
fair value standards, 171–174  
standards for valuation, 17

### **Investor surveys**

investor surveys as primary source of global input assumptions in discounted cash flow valuation modeling, 140–145

### **Land contracts**

developer use of land contracts to reduce subdivision risk and enhance potential profit, 242–252

### **Land rent**

bid-rent curves, 322  
determining highest and best use, 318–323

### **Land use**

highest-valued land use, 320–321

### **LEED rating system**

nationally recognized green standard for commercial properties, 64–67

### **Legally permissible use**

as an element of highest and best use, 45–49

### **Locational characteristics**

price impact of proximity to a beach or bay, 333–338

### **Lum Library**

using library databases, 76–79

### **Market analysis**

empirical conclusions based on market evidence, 333–334  
market interviews and surveys to determine opinions and perceptions of environmental contamination, 300–310

### **Mark-to-market**

valuation of real estate in the United Kingdom, 14–19  
valuing property at actual market value as opposed to historic cost, 171–174  
valuation for financial reporting, 20–34

### **Market value**

international standards, 171–174  
International Valuation Standards definition, 14–19  
market value for financial reporting, 20–34

### **Market value for existing use (MVEU)**

defined, 15–16  
valuation in financial reporting, 31–32

### **Market value for financial reporting**

standards for valuation for financial reporting, 14–19  
valuation of real estate for financial reporting in the United Kingdom, 14–19

### **Mineral appraisals**

market segmentation, 69–75

### **Mining businesses**

buyer segments, 70–71  
neighborhood analysis, 73  
property development categories, 71–74  
structure of the mining industry, 70–71

### **Monitored natural attenuation**

impact of monitored natural attenuation status on property values, 114–118

### **Monte Carlo analysis**

options-pricing models, 122–125

### **National economy**

housing's influence on national economy, 216–217

### **Negligence**

defined, 341  
claims against appraisers for professional negligence, 339–354

### **Null hypothesis**

testing of the hypothesis of "no effect on value" of proximity stigma, 253–262  
testing of effect of vacancy, 237

### **Online education**

barriers, 269–273  
designing distance education for appraisers, 266–273  
regulation, 270–271

### **Out-of-state buyers**

as a condition of sale adjustment, 54–55

### **Paired sales analysis**

determining the effect of environmental contamination, 300–310

### **Partnerships**

appraisal of family limited partnerships, 363–369

### **Pattern analysis**

statistical approach to examine the relationship of data sets, 165–170

**Percentage adjustments**

base adjustments in sales comparison approach, 157-162

**Perpetuity**

concept of perpetuity and present value factor, 136-137

perpetuity and income growth projections, 143-144

**Physically possible use**

as an element of highest and best use, 45-49

**Professional appraisal practice**

professional standards applicable to appraisers, 339-354

competency, 340

**Professional organizations developing valuation standards**

international and U.S. organizations developing valuation standards, 26-27

**Property performance determinants**

identifying the key property performance drivers, 163-170

**Property value loss**

impact of environmental contamination, 300-310

impact of freight train activity and railroad tracks, 223-233

**Proximity**

gradient and the decline in property values associated with increasing distances, 337-338

price impact of proximity to a beach or bay, 333-338

stigma impact on property value resulting from spatial relationship of property to a detrimental condition, 253-262

**Public Company Accounting Oversight Board (PCAOB)**

audit and attestation standards, 171, 174

**Public use**

court definition of public use in eminent domain cases, 311-317

**Railroad crossings**

impact on sale price, 226-233

**Railroad tracks**

effect of proximity to railroad tracks, 223-233

impact on sale price, 223-233

**Railroad train trips**

effect of number of freight train trips, 223-233

**Ratio analysis**

as a tool to examine property valuation conclusions, 148-154

**Real estate economics**

preservation premiums and restoration discounts, 127-134

**Real estate investment trusts (REITs)**

as a condition of sale adjustment, 53-56

**Real estate investments**

relationship between macroeconomic variables and returns for commercial property class, 163-170

**Real income growth**

uniquely paired capitalization rate and discount rate linked by corresponding income-growth factor, 135-146

**Real option**

computing the price of agricultural land with development option, 121-126

**Real rate of return**

real rate of return after taking into account the impact of inflation, 135-146

**Reasonably probable use**

as an element of highest and best use, 45-49

**Regression**

model used to measure price impacts of property-specific and market variables, 334-338

**Repeat sales**

methodology using repeat sales to test the possible effect of a detrimental condition, 254-260

**Research resources**

Lum Library databases, 76-79

**Restored properties**

impact of restoration on property values, 127-134

**Risk**

development risk, 244-245

full spectrum of real estate risk analysis, 370-375

marketing risk, 245

permitting risk, 244

subdivision development risk, 242-252

**Risky real rate**

computing real risky rate in development options, 121-126

**Royal Institution of Chartered Surveyors (RICS)**

*RICS Appraisal and Valuation Standards* ("the Red Book"), 14-17

review of European housing market, 210-215

standards for financial reporting, 28, 32

**R-square statistic**

strengths and weaknesses as a tool to examine property valuation conclusions, 148-154

**Sale adjustments**

for tax-deferred exchanges, 51-52, 55-56

for sales of bank-foreclosed properties, 52-53, 55-56

for transactions involving real estate

investment trusts (REITs), 53-54, 55-56

for sales to out-of-state buyers, 54-56

**Sale prices**

analyzing multiple listing services data using a hedonic pricing model, 357-360

impact of proximity to water, 333-338

impact of vacancy, 234-241

**Sales comparison approach**

adjustments for unusual conditions of sale, 50-56

dollar and percentage adjustments, 155-162

**Scope of work**

requirements under *Canadian Uniform Standards of Professional Appraisal Practice*, 342-343

requirements under *Uniform Standards of Professional Appraisal Practice*, 324-332

**Sensitivity analysis**

impact of variation in the time-value of money calculation, 124-125

**Statistical tests**

formal testing of the null hypothesis using statistical models, 237, 253-262

gradient and the decline in property values associated with increasing distances, 337-338

land-value gradient, 318-323

significance and tests for the strength of statistical associations between selling

prices and explanatory variables, 334-335

statistical reasoning in appraisal of family limited partnerships, 363-369

tests available, 256-260

transformation and dependent variable transformed into a natural log to correct heteroscedasticity, 335

**Stigma**

class action litigation, 38-44

models for measuring of stigma, 35-44

stigma effects, 35-44

survey approach to measuring stigma impacts, 35-44

using case studies to analyze adverse impact of contamination on property values, 111-118

**Subdivision development**

developer's profit, 245-250

land contracts to reduce subdivision risk, 243-244

risks associated with subdivision development, 242-252

**Survey research**

gauging opinions and perceptions of environmental contamination, 300-310

**Sustainable design**

elements, 57-68

**Tax-deferred exchanges**

as a condition of sale adjustment, 51-52, 55

**Tax policy**

impact of tax policy on economic bubbles, 217

**Timing of development**

computing the expected time of development, 121-126

**Toronto Valuation Accord**

summary of Toronto Valuation Accord, 27-28

**Uniform Appraisal Standards for Federal Land Acquisitions**

appraisal requirements, 99

statement of appraisal standards for property valuations, 178

**Uniform Relocation Assistance and Real Property Acquisition Policies Act**  
requirements for negotiations involving real property, 99

appraisal and subdivision analysis, 247-248  
developer surveys, 250-252  
expectation of profit, 242-252  
land contracts, 242-252  
profit, 245-252  
risk, 243-245

**Uniform Standards of Professional Appraisal Practice (USPAP)**  
compared with the *Canadian Uniform Standards of Professional Appraisal Practice*, 346

comparison of binding and flexible requirements, 324-332  
scope of work flexibility, 324, 328-329

**Urban revitalization**  
computing the present value of damages or benefits that will be realized at the time of redevelopment, 127-134

**Vacant houses**  
impact of vacancy on sale price, 234-241

**Valuation for financial reporting (VFR)**  
survey of issues and the organizations involved in valuation for financial reporting, 20-34  
valuing property at actual market value as opposed to historic cost, 171-174  
valuation of real estate for financial reporting in the United Kingdom, 14-16

**Variance inflation factor (VIF)**  
used to check for the multicollinearity problem in the larger data set, 227-233

## Titles

**Advanced Research Techniques of the Lum Library**

Eric Goodman, 76-79

**Appraisal Standards and Professional Negligence Claims**

## Cases in Brief

- Assessments must consider impact of long-term lease on property value, 289  
 Bridge closing ruled an exercise of police power, not an inverse condemnation, 3  
 Donation does not invalidate rezoning, 90-91  
 Church property housing missionaries on home assignment not tax exempt as property used purely and exclusively for religious purposes, 289  
 Condemnation action for private development project ruled unconstitutional, 196  
 Cost of remediation appropriate to consider when determining value of contaminated property for ad valorem purposes, 91  
 Court upholds real estate tax exemption for church parking lot, 290  
 Effect of environmental contamination, but not clean-up costs, considered in determining market value, 4  
 Expert testimony by court-appointed appraisers deemed prejudicial, 287  
 Failure to use recognized appraisal methods sufficient to support imposition of sanctions, 198  
 Future profits from unleased billboards not compensable in condemnation, 195  
 Future rezoning may be considered in determining just compensation, 89  
 Government-owned property leased to commercial tenants ruled not tax exempt, 197-198  
 Income capitalization approach rejected in valuation of truck stop partial taking, 89  
 Loss of direct access to highway not compensable where reasonable alternate access remains, 290  
 Medical clinics providing occasional free care are not exempt from property tax, 90  
 Neighborhood desirability rating challenged, 2  
 Opinion of value must be based on facts and data generally relied on by real estate experts, 2  
 Proof of property tax discrimination does not require valuation of neighboring properties, 196  
 Property tax exemption upheld for correspondence school, 195  
 Reducing convenience of access not a compensable taking, 90  
 Religious organization not entitled to property tax exemption for residential property, 287  
 Scouting organization does not qualify for property tax exemption unless operating under congressional charter, 288  
 Space leased by university to bank providing student services is tax exempt, 288  
 Tax credits are intangible property and not included in the value of property, 3  
 Testimony on possible rezoning requires showing of reasonable probability, 197  
 Township rezoning ordinance does not constitute spot rezoning, 1-2  
 Unimproved church land does not qualify for tax exemption, 198-199  
 Unit rule violated when timber value added to land value, 1  
 Wooded area does not constitute "necessary support land" for tax assessment purposes, 3-4
